Stage Diagram 'B'

***All items in Yellow provided by house prior to set up in these locations**

***All items in Blue provided by Artrageous & run from stage**

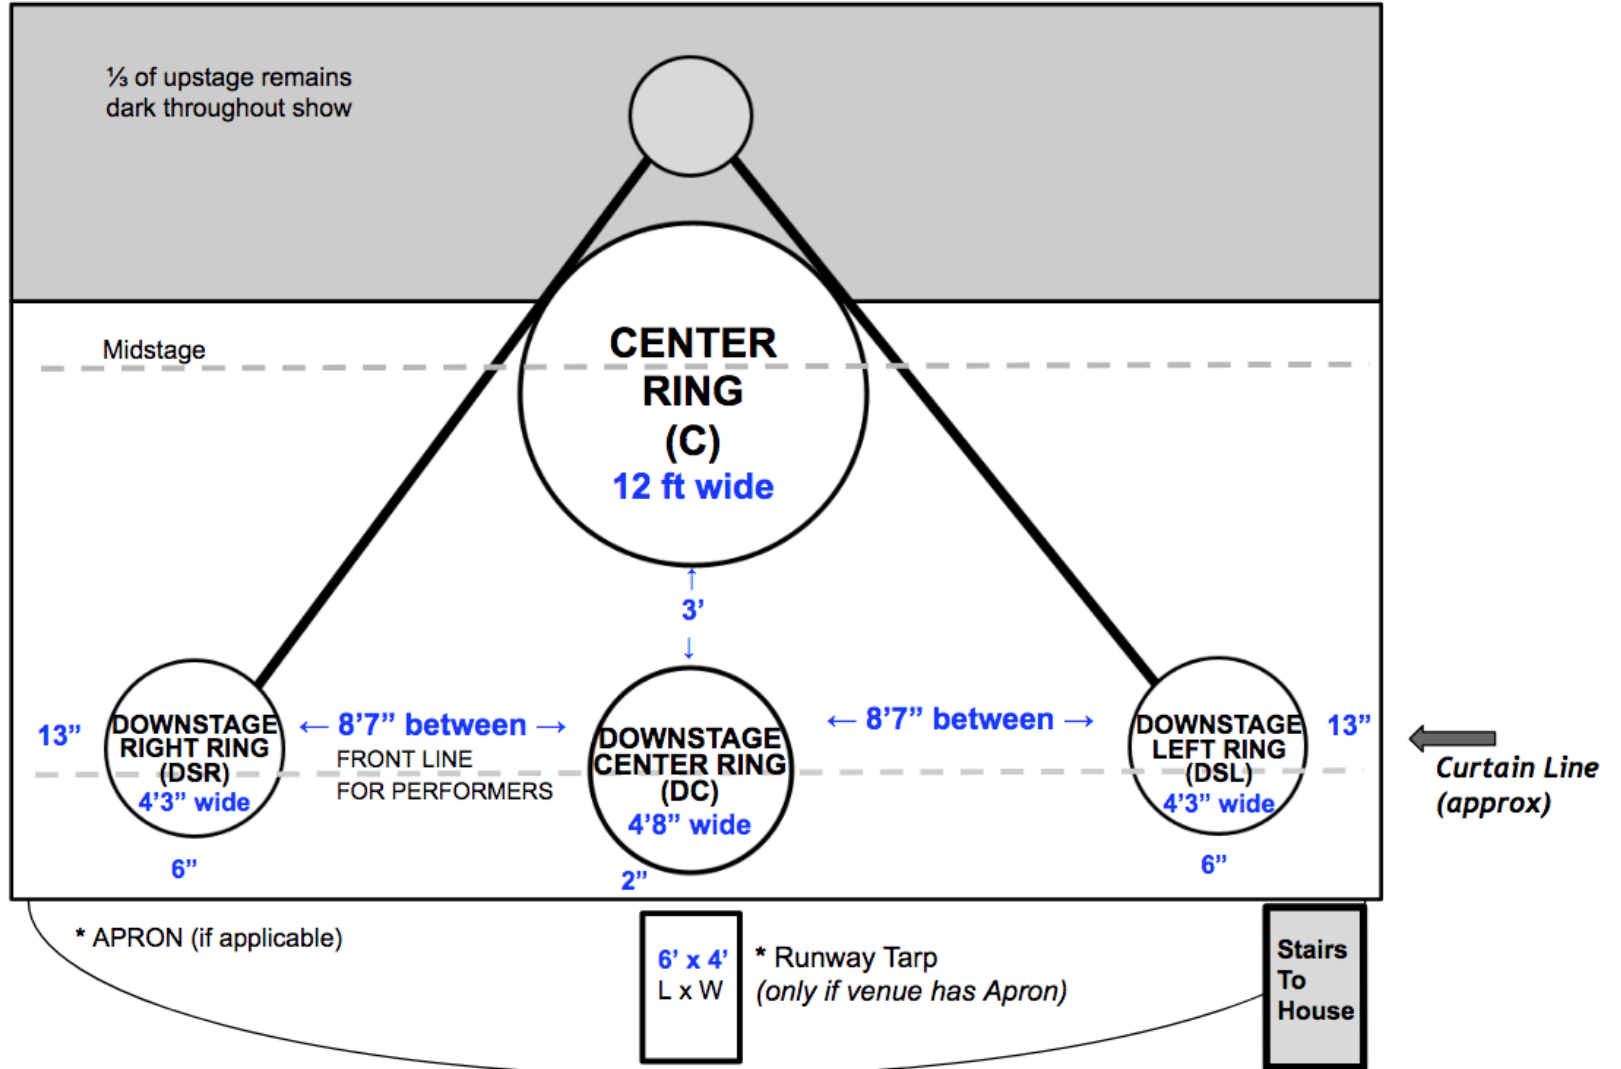

LIGHTING FOCUS (B)

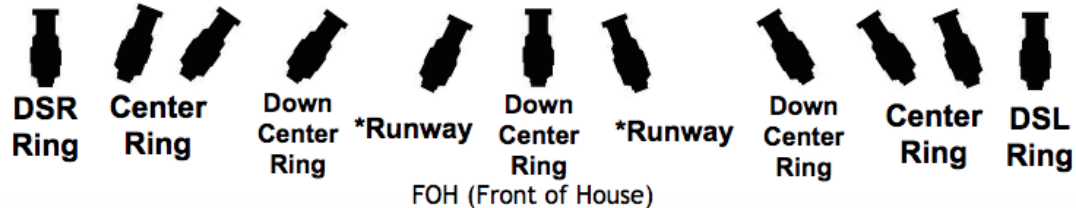

Artrageous travels with a 34' x 23' custom deck with 4 performance rings as shown. We ask that FOH lighting be roughly focused on these rings prior to our arrival based on this diagram. **All focusing of venue lighting is done to the Front Lights. We do not require electricians to be focused.**

34' WIDE

23' DEEP

Also add upstage wash going to mid stage →

LIGHTING

- Artrageous does not use followspots, nor do we add any lighting to your rigging or fly rails.
- Artrageous relies on the venue lighting system and LD in conjunction with their stage-based lights.
- Artrageous will set up their specialty lighting, walk through the show with your LD during setup, and run their board during the show.
- We provide a focus sheet and lighting show flow in advance and on site.
- Our Show Caller will also communicate with your LD using 1 Com (stage right) during the show.
- We ask for FOH lights (only) to be focused (no electrics required over the stage)
- We ask for white light (only) to be provided (no colors)
- We ask for lights to be focused and ready to trim PRIOR to load in (IF possible)
- Artrageous travels with ground-supported specialty lights: Wildfire LED Blacklight System, Astera Pixel Tubes, Eliminator Stryker LED Movers, which are all run by our ChamSys MagicQ MQ-80 board from stage

AUDIO

- Artrageous sets up and runs all of their own audio gear for the stage (monitors and in-ear monitors)
- Artrageous relies on the FOH sound system and Audio Engineer to run the House sound (only).
- Artrageous has an audio technician who runs all monitors during soundcheck and the show.
- We provide an audio show flow & input list for your Audio Engineer
- We use 17 Channels in our standard show
- We travel with a rolling rack with a monitor board, wireless mics, IEMs and a 32 channel splitter
- Splitter has 15' fan-out with all 32 channels, which we plug into the FOH patch bay or snake box
- We request our Audio Rack to be stage left (whenever possible).
- We run 3 monitor wedges downstage, a snake upstage for backline, & provide all backline gear and cabling.

STANDARD SHOW DAY TIMELINE:

All timing agreed upon by the Presenter & Artist. If a student Artreach program is added, timing is subject to change.

LOAD IN

- 0-30 min: Load in & deck floor covering set (which has lighting focus rings on it)
We set up our own equipment on stage
- 45 min: Upstage fly bar lowered to hang backdrop
